State : Safety

GENERAL COMMANDS	VALVE CHECK COMMANDS	VALVES
status: Current state	cyclevalves: Automatic valve check.	PV-F01: Fuel Pressure
loxprefill	Turn ON valve: pvf01on	PV-L01: Lox Pressure
loxfill	Turn OFF Valve: pvf01off	PV-P01: Fuel Purge N2
loxchill	alloff: Turns igniter and valves OFF	SOV-F01: Fuel Vent
safety		PV-F02: Fuel Main
pressurize		PV-L03: Lox Main
ignition		PV-LF01: Lox Fill
valvecheck		PV-L02: Lox Vent
off: Terminate AC software.		PV-P02: Lox Purge
exit: Ends BB_AI script		IG: Igniter
resetac: Resets the AC software		
resetm : Reset Marionette software		
clear: clears the output screen		

VALID TRANSITIONS BETWEEN STATES

Safety -> Valve Check -> Safety

Safety -> Lox Pre Fill -> Lox Fill -> Lox Chill -> Safety -> Pressurize -> Ignition

(Auto Start): Ignition (5s) -> Oxidizer Start (.2s) -> Firing(3s) -> Purge(3s) -> Safety (Auto End)

Sensor values:

- Box color within nominal value range: Light Yellow
- Box color outside nominal value range: Light Red

Valve indicator:

- Square valve ON: Green
- Square valve OFF: Blue
- Square valve error: Red

Liquid Fuel Engine Test Stand
